

## Salmon Watch Program Summary – Fall 2023

### Another Successful Year in the Books!

In collaboration with partners and volunteers, we were able to provide 7 weeks of field trips, bringing students outdoors to learn about their local watersheds. Thanks to funding from the Jackson Soil & Water Conservation District and contributions from the water quality programs of local cities (Ashland, Central Point, Grants Pass, Jacksonville, Medford, Phoenix, and Talent) and counties (Jackson and Josephine), as well as seventeen additional partner organizations, we were able to provide no-cost field trips to students primarily in grades 3rd-8th from nine school districts and twelve private/charter schools in the Rogue Basin. In addition, we taught mixed (1<sup>st</sup> through 5<sup>th</sup>) and AP high school classes. Collaboration and partnership make it happen!

# of students served: 1,706

# of schools participating: 28

# of individual instructors contributing: 34

### Coordinating agencies:

Students learning about the Rogue River Basin and the importance of watersheds.

Students collecting macroinvertebrates using D-nets.

### Students learn at 4 stations:

- Salmon Biology
- Riparian Ecology
- Water Quality
- Macroinvertebrates

## Thank you, Salmon Watch Partners!
